

PROBLEM #1.

Which functions converge to the "x" from the starting point "o".

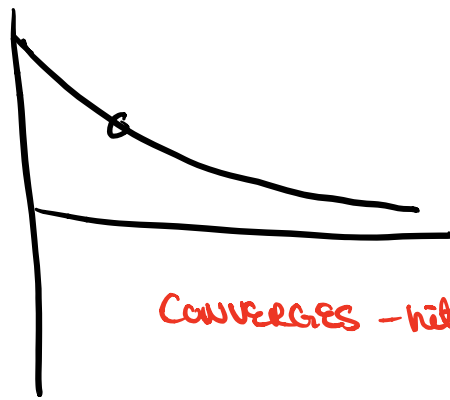

Newton-Raphson

$$x_{i+1} = x_i - \frac{f(x_i)}{f'(x_i)}$$

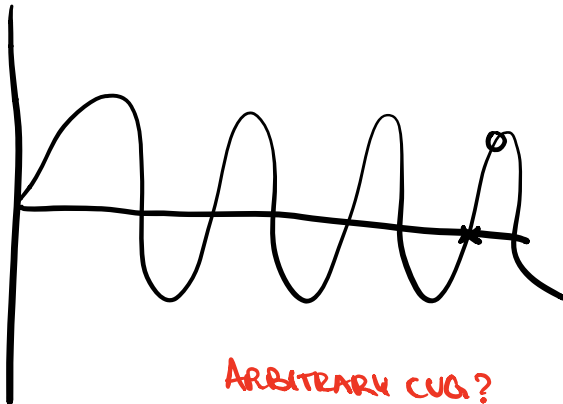

NO CUG - OSCILLATES.

CONVERGES - hits limit

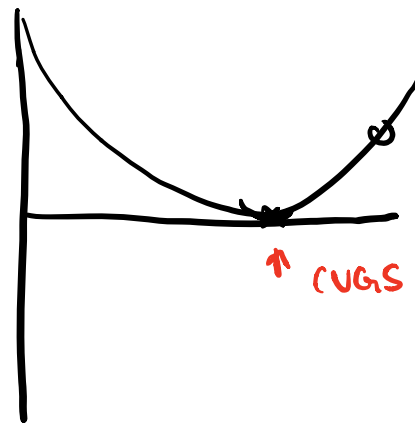

ARBITRARY CUG?

DING PONGS AROUND

THE UNIT CIRCLE

ω - DECREASING / INC

FROM INFINITY / INF.

↑ CUGS
